

Turf Nutrition

A fertile productive soil is a biologically active soil in which large microbial populations flourish. Chemical fertilizers can detrimentally influence soil microbial populations causing an imbalance which impacts on the soil humus level - the nutrient storehouse of the soil. The preoccupation with soil chemistry (NPK) has resulted in the neglect of the soil biology - vital for turf nutrition.

Programme

AgriSea Soil Nutrition Apply 5L per ha of in Autumn to aid root development) and again in Spring to aid root length and mass and increase soil biology.

AgriSea Turf Nutrition Apply 5 L per ha of in Spring and Autumn at the beginning of the growth flush and every 2-4 weeks throughout spring and early summer to aid resistance to fungal diseases, aids in periods of drought, stays green longer.

Free delivery for 100L size and above, North Is., NZ
20L = \$220 100L = \$920 200L = \$1665 1000L = \$6277

Please add GST to all these prices

Benefits

- Expect a thicker sward (research has shown a significant increase in root mass).
- Grass will have more fibre, and contain more nutrients.
- Faster recovery from drought conditions due to healthy humus layer and stronger root structure – helps during summer dry spells.

If the soil is lacking in trace elements and minerals so will the turf.

AgriSea uses only one New Zealand native seaweed species that is extremely high in alginates, (soil conditioning factors) mannitols - a chelating agent that releases 'locked up' trace elements, minerals & micro-nutrients.

NZ seaweed is best suited for NZ soil types and is as good as the world can offer.

AgriSea New Zealand - PURPOSE

AgriSea New Zealand is concerned, above all, about the health of the environment and the health of future generations. By manufacturing safe products that are effective and have integrity; and being engaged in the educative process of learning & teaching; we contribute to changing peoples' attitudes and the future is improved for our children's children.

AgriSea New Zealand - VISION

AgriSea New Zealand will be an international, regionally based business providing opportunities for local communities; upholding values, principles and practices that contribute to a healthy sustainable future for coming generations globally.

AgriSea New Zealand - VALUES

We will act with openness & honesty respecting the strengths each person brings to our organization. We will build a wise, savvy, problem-solving team empowered to grasp the large & small opportunities in order to grow a strong business community that promotes a healthy sustainable planet.
