

# GROW WITH US

**AGRISEA & WESCO SEEDS  
2023 PASTURE GUIDE**

**Together, Agrisea and Wesco Seeds Ltd have worked to formulate a range of pasture seed mixes to provide an improved nutrition solution for your grazing animals.**

This diverse pasture option is better suited for your animals, your farming system and the environment because of its ability to increase your soil and stock health.

# Why should you include diverse species into your pasture systems?

Better ground coverage collects more energy that feeds sugars to the roots and microbes to greater depths. Top soil growth is developed deeper.

Deeper diverse roots attract more beneficial biology that improves soil aeration and water retention.

Different plants use different nutrients and attract different types of biology to promote better nutrient cycling.

A wider range of nutrients (proteins, carbohydrates, fats, fiber, vitamins, and minerals) are presented to the grazing animals that help with their general wellbeing.

# Agrisea Mix

This mix is great for a wide range of farming types such as sheep farming, beef farming or dairy farming.

# Helpful tips to know when Sowing Wesco Seed

## 1. Know your soil pH and nutrient status:

6 months before sowing.

## 2. Planting depth is critical to germination and plant survival:

No more than 15cm deep.

Small seeds (clover, plantain etc.) max 10mm deep.

## 3. Check soil condition:

Dry soil, plant seeds slightly deeper; closer to soil moisture.

Damp soil plant seeds closer to the surface.

Ensure the seed bed is firm to retain moisture.

## 4. Application method:

Is suited to the seed mix and field environment.

## 5. Use a crop diary to record:

Paddocks & crops used. Planting dates & rates.

Soil moisture, temperature. Weather.

Application type & settings. Harvesting/grazing dates.
